

THE "PRUDENT MAN" GIVES HIS WIFE A BANK ACCOUNT.

Every man should give his wife a bank account so that she can pay her bills with checks and keep a "check on her bills." A bank account teaches everyone, who has one, to be business-like and ECONOMIZE.

Then no pleasure is greater than seeing the balance to your credit GROW and GROW.

A woman will SAVE MONEY for her husband if he will only give her a chance.

Make OUR Bank YOUR Bank.

Farmers & Merchants Bank

Frightened By Tramps?

BELL Telephone wires coming from the farm house are a grim warning to tramps.

Because they know how easy it is to spread an alarm and summon assistance by Bell Telephone, tramps give the farm house equipped with one a wide berth.

Is your home protected with Bell Telephone Service?

The Southwestern Telegraph and Telephone Company

CARL HARLEY, Manager, Paris, Mo.

THE DEMOCRAT

W. J. ROUSE, Editor

TERMS \$1.00 PER YEAR

Entered at the Postoffice at Hannibal, Mo., as second-class matter, May 21, 1914.

THURSDAY, MAY 21, 1914

Solitude.

Laugh and the world laughs with you

Weep, and you weep alone
For the sad old earth must borrow its mirth

She has trouble enough of her own
Sing, and the hills will answer
Sigh, it is lost to the air
The echoes bound to a joyful sound
But shrink from voicing care.

Rejoice, and men will seek you
Grieve and they turn and go,
They want full measure for all your pleasure

But they do not need your woe
Be glad, and your friends are many;
Be sad, and you lose them all—
There are none to decline your nattered wine

But alone you must drink life's gall.

Feast, and your halls are crowded
Fast, and the world goes by;
Succeed and give and it helps you live.

But no man can help you die.
There is room in halls of pleasure
For a large and lordly train
But one by one we must all file on
Through the narrow aisles of pain.
— Ella Wheeler Wilcox.

Ben Seward went to Quincy Friday and returned home the following day with his wife who has been in St. Mary's hospital there. Mrs. Seward is improving nicely.

Miss Fern Crawford who has been attending school here the past year returned to her home near Hunnewell, Saturday. Mrs. Roy Sorrell and baby accompanied her for a short visit.

Mrs. Ella Briscoe went to New London the last of the week for a month's visit with her sons, Harry and Robert Briscoe.

Miss Frances Larson of Bucklin, arrived Saturday to visit her sister, Miss Caroline Larson.

Mrs. E. R. Moss and baby are spending the week with relatives near Woodland.

Ivan Yates and family spent Sunday with Clarence relatives.

HOW ONE WOMAN WON

Her Health and Strength Back Again by The Use of Cardui.

Tampa, Fla.—In a letter from this city, Mrs. E. C. Corum writes: "I was all weakened and worn out with womanly troubles. My husband brought me some Cardui as a tonic, and, from the first day, it seemed to help."

I had almost lost my reason, but, thanks to Cardui, I did not. Soon, I felt and looked like a new woman. I think the remedy is wonderful. I recommend it to my friends, for I have received great benefit from it."

Cardui acts specifically on the weakened womanly organs, strengthening the muscles and nerves, and building them up to health.

It helps to refresh the worn-out nervous system and relieves the effects of overwork, both mental and physical.

Fifty years' successful use fully prove the merit of this purely vegetable, tonic remedy for women.

In every community, there live some who have been benefited by Cardui.

The beneficial effects of this time tested woman's remedy, soon show themselves in many different ways. Try it.

N. B.—Write for Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper on request.

Mrs. George Dye of Clarence, spent part of the week here with her parents, C. L. Drescher and wife. She returned home Friday and that night with Mr. Dye went to Quincy to visit Wesley Drescher and wife.

Prof. James B. Rogers has been elected Superintendent of the Frankford Schools. Prof. Rogers is a splendid school man and will give Frankford good service.

John Ross and wife of Forest Grove, Wash., who have been guests of B. F. Welsh, left Saturday for Camp Point, Ill. to visit relatives.

Mrs. Evan Smith and daughter, Miss Margaret, spent Friday in Quincy. Miss Margaret underwent an operation of the ears and throat the week before and had to return for treatment.

Mrs. Wm. Young and Miss Vivian Veach were Quincy visitors Friday.

Miss Sarah Burton of Macomb, Ill., arrived Friday to visit her parents, Wm. Burton and wife.

Hog Raising Hints.

Missouri Valley Farmer

Hogs should have good warm, dry beds during the chilly nights of late spring and early fall and during cold, wet weather in summer. This will prevent many cases of pneumonia, probably a greater hog killer from year to year than cholera.

Feeding and care are as important as breeding in turning out a good hog. They will sometimes make a good hog out of a runt, but lack of them will always make a runt out of a good hog.

Pasture and forage crops are needed to make cheap pork.

Begin feeding a pig as soon as it will eat and keep it growing until mature.

Lice and worms keep hogs in poor thrift. Keep these parasites out of the herd.

Keep a mixture of wood ashes, charcoal, salt, lime, sulphur and copperas before the hogs all the time.

Young pigs need plenty of exercise, sunshine and dry beds.

Never keep a sow no matter how good or well bred she may be if she will not produce more than five strong pigs at a litter.

The more milk a sow gives after her pigs are old enough to take it, the faster it will grow.

Fifty years ago Saturday May 9 snow fell in New London. In conversation with George E. Mayhall of this city he stated that an May 9 1864 Bailey's circus exhibited in New London. An immense crowd was present. During the afternoon a rain fell that made the water stand "shoemouth deep" all over the town. The show tent was new and those who were inside did not get wet. The water was about four inches deep in the tent which was located where F. M. Crow's residence now stands. The only dry place under the tent was the ring and the earth thrown up kept the water out of there. After the rain was over it commenced to turn cold and by night the thermometer had dropped to almost freezing. Snow fell and ruined all the gardens, which were up and looking fine. Salt River and Spencer Creek were put out of ford by the heavy rain and hundreds of friends stayed all night with friends in New London and vicinity. History came almost repeating itself Saturday, May 9, 1914. Frost was discernible in New London Friday morning and it was cold all day.—Ralls Co. Times

Care of Young Chicks

Studies at the Missouri Agricultural Experiment Station warrant the following recommendations in regard to the care and feeding young chicks:

During the first two days of the chick's life it should rest and be kept warm. It is better without having food until it is forty-eight hours old. Then the following mixture should be fed in dry litter and also in a shallow tray: 3 parts finely cracked wheat, 3 parts finely cracked corn, 1 part steel cut oats. Keep some of this in the litter all the time.

Chicks should have access to a clean drinking fountain which should also be so constructed that they cannot get themselves wet. It is also desirable to give them access to sour skim milk or buttermilk. Twice daily the chicks should receive rolled oats or the following mixture: 3 parts bread crumbs, 3 parts corn bread, 1 part boiled egg. This mixture may be fed dry or it may be moistened with sour milk. A very small amount of charcoal and finely cut green food should also be fed.

Continue the mixture of wheat, corn and oats until the chicks are four weeks old changing gradually from the finer to more coarsely ground feed. Keep the following mixture in a box where chicks may

run to it at all times: 30 parts wheat bran, 30 parts corn meal, 30 parts wheat middlings, 10 parts beef scrap, sifted fine and 1 part bone meal

Keep fine charcoal and grit where chicks may have free access to it. Feed 4 times daily. Continue the green feed and give the chicks milk. It may be advisable to feed a wet mash once a day at 4:00 p. m. Feed only what the chicks will eat up clean before going to roost. Change gradually from chick food to cracked corn and wheat. Chickens that are not yarded should be fed corn and wheat in litter as a scratch food and should also have access to a dry mash in a hopper where they can help themselves.

Raise chickens with the simplest rations possible. Clean food, consisting of cracked and ground grain; animal food, such as sour milk, buttermilk, commercial meat scrap and bone meal; clean water, plenty of shade, comfortable and dry quarters, from lice and access to clean fresh earth are essential for successful brooding.

Opportunity.

Lots of fellows have overlooked an opportunity simply because they were too close to it.

Don't be like the sick man who heard of the curative properties of the waters of Karlsbad and went there to take them. After he arrived he consulted a physician, who carefully diagnosed his case and then told him that his particular ailment would respond better to the waters of a certain spring in America. "Which spring?" asked the patient. "One of the springs in Saratoga," replied the doctor. "That's certainly tough!" said the sufferer, "I live in Albany."

If you're made of the right stuff you'll find plenty of room to create something for yourself in the job you've got; you can grow just as big there as you can in something of your own building.

They say that opportunity knocks once at every man's door. I don't know the name of the scientist who managed to get to such a fine line on the habits of opportunity; but if opportunity does announce itself, the chances are that it misses many a door, and, in some cases, when it does knock, I presume, "there's nobody at home."

My impression is that opportunity as a rule doesn't knock at all—or very rarely. Opportunity consists of thinking, doing, having plenty of patience and perseverance possessing the ability to size up a situation and having the nerve and willingness to take advantage of it.—Leslie's Weekly.

Mrs. Josephine Hibbert and granddaughter, Miss Josephine Morthland, went to Hannibal Friday to consult Dr. Howell about Miss Josephine's eyes.

Mrs. N. L. Crane who has been visiting at John Hardy's home, returned to Palmyra the last of the week.

Mrs. D. A. Dobson and Mrs. Charles Reed of Hunnewell, visited Mrs. Orville Wilson, Saturday.

Mrs. Anna Powers spent the week end with her son, Robert Spalding and family in Shelby.

Miss Gertrude Luster who has been trimming for Miss Sallie Rouse, returned to her home in Quincy, Saturday.

Roy Kirk and Miss Ruby Adams of Shelby, visited S. H. Baynum's family the last of the week.

Mrs. L. W. Fowler, of near Hunnewell has been a guest of S. B. Fowler and wife.

Mrs. Beach Drake, of Hannibal spent Saturday with Dr. S. Maddox and family.

Miss Minnie Jacobi, of Palmyra spent Friday here.
